

# Forestry Institute for Teachers Fall 2024 Focus Sessions

## What is FIT-Focus?

FIT-Focus offers educators the opportunity to dive deep into key ecological and management issues facing California’s forests today! Over the course of 3 days, teams of natural resource specialists and credentialed instructors facilitate unique field explorations that weave together environmental education curriculum and place-based learning from professionals.

Participants receive teaching materials and targeted support to design a Curriculum Project related to each session’s suite of focus topics.

## Who Can Attend?

FIT is professional learning for all California educators. Sessions welcome formal and nonformal educators, as well as administrators.

FIT-Focus sessions are designed to enrich a FIT Graduate’s experience with the core FIT summer program, or introduce a new attendee to aspects of California forestry.
